

BIH6.52213 Water Blaster 2200 psi

Designed for the building, plant maintenance, transport, agriculture and horticulture industries, the BIH652213 petrol water blaster is powerful enough to handle most jobs. This unit efficiently combines water pressure with volume to clean effectively whilst keeping wastage to a minimum.

Built in New Zealand by Kerrick, this water blaster comprises a genuine Honda motor directly driven by an Italian Interpump high pressure pump. Features include a removable handle for easy transportation, gun and lance with various quick connect nozzles, detergent venturi and 10 inch pneumatic tyres. Compact, heavy duty and fairly priced this petrol water blaster is worth a second look.

Part No.: BIH6.52213

Usage rating: ●●●●●
